

What are the new solar power generation facilities

Here is a list of the largest planned solar projects in development in the US --ranked by planned capacity in megawatts. These projects are expected to come online in the coming years. Scroll down ...

The Ivanpah Solar Electric Generating System is a concentrated solar thermal plant located in the Mojave Desert at the base of Clark Mountain in California, across the state line from Primm, Nevada.

Since the passage of the IRA, Texas has announced 16 new or expanded solar facilities, representing over 33 GW of new manufacturing capacity, over \$1.8 billion in investment, and over ...

The project is a solar facility with 309 MW capacity on approximately 2,900 acres in Calhoun County, Michigan. The construction will commence in March 2024 and is expected to begin ...

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

The 690-megawatt (MW) solar and storage Gemini facility in Nevada and the 653-MW Lumina Solar Project in Texas were the largest solar projects that came online in the first six months ...

Frye Solar, located in Kress (Texas), is the largest solar project built by Repsol, with nearly one million panels, a total installed capacity of 637 MW and 570 MW currently in operation. ...

The United States Large-Scale Solar Photovoltaic Database (USPVDB) provides the locations and array boundaries of U.S. photovoltaic (PV) facilities with capacity of 1 megawatt or more. It includes ...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.
