

Wind ordinances on the city, county, and state levels may be difficult to understand, whether you are an expert or just becoming familiar with the industry. This guide is meant to assist policymakers in ...

Understand the complexities of siting and permitting wind energy projects, including federal and state regulations, environmental reviews, and strategies to address community concerns and opposition.

On his first day in the Oval Office, President Donald Trump signed an executive order that attempts to slow the growth in the country's wind generation capacity.

Wind energy, in particular, is often cited as one of the fastest-growing commercial energy sources in the world. Currently, most U.S. wind energy production capacity is based on land. A ...

Across America, local bans, moratoriums and construction impediments are blocking wind and solar energy with increasing levels of red tape. Here's what USA TODAY's analysis found.

In this paper I provide an overview of conflicts over wind wakes and flag recent developments in case law that address this issue. Specifically, I analyze a 2021 Appellate Court of ...

Local governments across the U.S. are blocking new clean energy plants. See the best locations for wind and solar power, and where it's being stopped.

As an example, Texas is the state with the most wind power generation, accounting for more than a quarter of total U.S. wind-power generation. In the NREL database, there are 24 county ...

WASHINGTON -- Today, U.S. Secretary of the Interior Doug Burgum signed a Secretary's Order to more efficiently manage our nation's energy resources by permitting projects ...

A wind energy ban could include prohibiting wind energy development in the expressed area, such as by limiting project output capacity (expressed in MW or kW), or by restricting the offsite use of the ...
